

Project Initialization and Planning Phase

Date	18 August 2026
Team ID	.
Project Title	Global AI Adoption in Education
Maximum Marks	3 Marks

Project Proposal (Proposed Solution)

Project Overview	
Objective	Analyze global AI adoption in education and identify key differences and influencing factors across students, teachers, and schools.
Scope	Analyze AI adoption across 10 countries and 6 regions from 2015–2026 using student, teacher, school, infrastructure, curriculum, and policy data.
Problem Statement	
Description	AI adoption in education varies across students, teachers, and schools due to differences in digital access, curriculum integration, and policy environments.
Impact	Identifying these adoption gaps can help educators and administrators make better decisions about AI integration and educational technology.
Proposed Solution	
Approach	Clean and analyze the dataset using Excel and create interactive Tableau visualizations to identify AI adoption trends, gaps, and influencing factors.
Key Features	Student, teacher, and school AI adoption analysis with country, regional, time, infrastructure, curriculum, and policy comparisons.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU specifications and processing capability	Laptop computer
Memory	RAM specifications	8 GB RAM
Storage	Storage space for dataset, project files and dashboards	Laptop storage
Software		
Frameworks	Frameworks used for project development	Not applicable
Libraries	Programming use for data analysis	Not applicable
Development Environment	Tools used to develop manage and present the project	Tableau and GitHub
Data		
Data	Source, size and format of the dataset	AI education dataset, 1,360 rows × 16 columns, CSV format
