

Project Initialization and Planning Phase

Date	18 August 2026
Team ID	.
Project Name	Global AI Adoption in Education
Maximum Marks	3 Marks

Problem Statement (PS)	I am	I'm trying to	But	Because	Which makes me feel
PS-1	I am a student	I'm trying to use AI tools as part of my learning	I do not always have equal access to AI tools and AI-supported learning resources	Internet access, AI availability, and curriculum integration differ across educational environments	Uncertain about whether I can fully benefit from AI in my education
PS-2	I am a teacher	Integrate AI into my teaching and classroom activities	I do not have consistent access to the tools, infrastructure, and support needed to effectively use AI in my classroom	AI adoption depends on factors like internet access, curriculum integration, school readiness, and government AI policy, which vary widely across regions.	Uncertain about how consistently and effectively I can integrate AI into my teaching
PS-3	I am a school administrator	Successfully implement AI adoption and AI-supported learning in my school	I face difficulty in implementing AI effectively because AI adoption levels vary widely across countries and regions, making it hard to follow a consistent implementation strategy	Internet penetration, AI curriculum integration, government AI policies, and levels of student and teacher AI usage differ	Uncertain about how to plan and implement effective AI adoption
