

Data Collection and Preprocessing Phase

Date	19 august 2026
Team ID	.
Project Title	Global AI Adoption in Education
Maximum Marks	10 Marks

Data Exploration and Preprocessing

Section	Description
Data Overview	The dataset contains 1,360 records and 16 columns , covering AI adoption in education across 10 countries and 6 regions from 2015–2026 .
Data Cleaning	Checked and handled missing values, duplicates, and inconsistent data .
Data Transformation	Performed filtering, sorting, and calculated fields to prepare the data for analysis.
Data Type Conversion	Corrected data types for numerical, percentage, date, and categorical fields.
Column Splitting and Merging	Separated and organized date-related fields such as Year and Month where required.
Data Modeling	Organized dimensions and measures and created calculated fields for Tableau analysis.
Save Processed Data	Saved the cleaned and processed dataset for Tableau visualization and further analysis.
