

Business Question and Visualization Report

Date	20 August 2026
Team ID	.
Project Name	Global AI Adoption in Education
Maximum Marks	5 Marks

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting.

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau. Well-framed questions help in identifying key metrics, selecting relevant data, and building visualisation that provide insights.

1. How has AI adoption in education changed from 2015 to 2026?

- **Visualization:** Line chart showing Student AI Usage, Teacher AI Usage, and Schools AI Adoption over time

2. Which countries have the highest levels of AI adoption in education?

- **Visualization:** Map visualization comparing AI adoption across different countries.

3. How is the Education Index distributed geographically across key global nations?

- **Visualization:** Map visualization highlighting average Education Index scores by country.

4. Which global regions are currently leading in overall school AI adoption?

- **Visualization:** Donut chart comparing total school AI adoption metrics across various regions.

5. What is the relationship between internet penetration and AI adoption?

Visualization: Scatter plot showing the relationship between internet penetration and AI adoption.

6. How does urban AI usage compare with rural AI usage?

- **Visualization:** Line chart comparing Urban AI Usage and Rural AI Usage.

7. Which countries have the highest and lowest average daily AI usage in education?

Visualization: Lollipop chart showing average daily AI usage by country.

8. Which Region have the largest and smallest gender gaps in AI usage?

- Visualization:** Horizontal bar chart showing the gender gap in AI usage by country.

9. How do government AI policy adoption levels compare with AI curriculum integration levels?

- Visualization:** Heat map comparing Government AI Policy and AI in Curriculum

10. Which AI tools have the highest and lowest Student and teacher usage levels in education?

- **Visualization:** Stacked Bar chart showing the student and teacher usage levels of leading AI tools in education.
